To whom it may concern

David Reid Homes (Southland) Ltd uses the Cupolex flooring system and has found it to be a cost effective solution for us. We typically do large floors and Cupolex offers reduced concrete consumption over the alternatives which represents a good saving to us and our clients.

Our catchment area is a long way from the main centres and because the Cupolex components nest together, freight costs are minimised as well as site area for storage.

Our builders enjoy installing the system, which is important, and our clients can enjoy the high thermal rating the Cupolex solution offers.

Tim Farman is in easy contact and has been great to deal with. Getting a quote on a job from Tim only takes a matter of days and the process of ordering is also very simple and prompt.

I would have no hesitation (and do) recommending Cupolex to other builders.

Yours faithfully

Chris Leith
Director – David Reid Homes (Southland) Ltd
